

1. Install the QR code scanner on your smartphone

2. In the MG, open the open code of the wallet using the password

3. Scan this QR code by the program on the smartphone, as a result you will receive a alphanumeric code (HEX format).

For example:

```
30770201010420ba1cbaf25add771c388143100a55563fad4a9863b1bccd369aec0d5a00fa6db8a
00a06082a8648celi3khj4534klj564lkdv908jsdf9njh05f40dc610ae683430a49f1092d9210937de0
530e415f728069ea54a9d1ca689cdef983361fdb2ef2fc535c5182a864847c3310adc6b562bfe617
617
```

4. Send a code in the text file to you PC
